The profile of the company:

We are one of the major Italian firm that works in the wheels production sector.

Above all, we provide facilities for large retailing and internal handling.

In particular, our products, that are in line with the highest Italian and international quality standards, are made up of zincd supports, wheels of polypropylene, nylon, polyurethane nylon, elastic rubber and rubber with mix to face high temperature.

Our thirty-year experience lets us satisfy our customers requirements in the best way and in a very short time, both in terms of deliveries and in terms of particular applications of products, with a suitable technical support.

Samples can be provided quickly and for free.
